1999 Journal of Fluids Engineering Index
Index by Subject Matter to JFE, Vol. 121
Nos. 1–4, 1999

AIRFOILS AND HYDROFOILS

Computation of Unsteady Viscous Marine-Propulsor Blade Flows — Part 2: Parametric Study, Eric G. Paterson and Fred Stern, March, 139–147.

Study of Tip Vortex Cavitation Inception Using Navier-Stokes Computation and Bubble Dynamics Model, Chao-Tsung Hsiao and Laura L. Pauley, March, 198–204.

High-Lift Optimization Design Using Neural Networks on a Multi-Element Airfoil, Roxana M. Greenman and Karlin R. Roth, June, 434–440.

Numerical Computation of Tip Vortex Flow Generated by a Marine Propeller, Chao-Tsung Hsiao and Laura L. Pauley, September, 638–645.

Re-Entrant Jet Modeling of Partial Cavity Flow on Two-Dimensional Hydrofoils, J. Dang and G. Kuiper, December, 773–780.

Re-Entrant Jet Modeling of Partial Cavity Flow on Three-Dimensional Hydrofoils, J. Dang and G. Kuiper, December, 781–787.

BLUFF-BODY FLOWS

A Domain Decomposition Approach for Incompressible Flows Past Multiple Objects, Hwar-Ching Ku and Bala Ramaswamy, June, 343–350.

Numerical Study of Vortex Shedding from a Circular Cylinder in Linear Shear Flow, A. Mukhopadhyay, P. Venugopal, and S. P. Vanka, June, 460–468.

Drag Reduction in Laminar Flow Between Two Vertical Coaxial Cylinders, Keizo Watanabe and Takashi Akino, September, 541–547.

Aerodynamic Torque Acting on a Butterfly Valve. Comparison and Choice of a Torque Coefficient, C. Solliec and F. Danbon, December, 914–917.

A Model for Flows with Massive Separation, K. Sanjeev Rao, December, 917–919.

BOUNDARY LAYER AND SHEAR FLOWS

Turbulent Boundary Layers Subjected to Multiple Strains, Andreas C. Schwarz, Michael W. Plesniak, and S. N. B. Murthy, September, 526–532.

Synergistic Effects in Turbulent Drag Reduction by Riblets and Polymer Additives, H. Mizunuma, K. Ueda, and Y. Yokouchi, September, 533–540.

The Stress-State in a Torsion Shear Cell Filled with a Newtonian Fluid, M. A. Koenders, N. Gaspar, and E. Liebhart, September, 560–567.

Geometry Effects on Free Surface Vorticity Flux, Bill Peck and Lorenz Sigurdson, September, 678–683.

CAVITATION

Study of Tip Vortex Cavitation Inception Using Navier-Stokes Computation and Bubble Dynamics Model, Chao-Tsung Hsiao and Laura L. Pauley, March, 198–204.

Propeller Sheet Cavitation Predictions Using a Panel Method, A. C. Mueller and S. A. Kinnas, June, 282–288.

Investigation of Unsteady Sheet Cavitation and Cloud Cavitation Mechanisms, T. M. Pham, F. Larrarte, and D. H. Fruman, June, 289–296.

Numerical Model of Cavitating Propeller Inside of a Tunnel, Jin-Keun Choi and Spyros A. Kinnas, June, 297–304.

Analysis of Rotating Cavitation in a Finite Pitch Cascade Using a Closed Cavity Model and a Singularity Method, Satoshi Watanabe, Kotaro Sato, Yoshinobu Tsujimoto, and Kenjiro Kamijo, December, 834–840.

Transient Behavior of a Cavitating Centrifugal Pump at Rapid Change in Operating Conditions — Part 1: Transient Phenomena at Opening/Closure of Discharge Valve, T. Tanaka and H. Tsukamoto, December, 841–849.

Transient Behavior of a Cavitating Centrifugal Pump at Rapid Change in Operating Conditions — Part 2: Transient Phenomena at Pump Startup/Shutdown, T. Tanaka and H. Tsukamoto, December, 850–856.

Transient Behavior of a Cavitating Centrifugal Pump at Rapid Change in Operating Conditions — Part 3: Classifications of Transient Phenomena, T. Tanaka and H. Tsukamoto, December, 857–865.

Three-Dimensional Linear Analysis of Rotating Cavitation in Inducers Using an Annular Cascade Model, Satoshi Watanabe, Kazuhiko Yokota, Yoshinobu Tsujimoto, and Kenjiro Kamijo, December, 866–871.

COMPRESSIBLE FLOW

On the Suitability of the Low Mach Number Assumption in the Modeling of the Damage Induced by Pressure Transients in Piping Systems, Felipe B. Freitas Rachid and Heraldo S. Costa Mattos, March, 112–117.

Fluid Motion in Ultrasonic Flowmeter Cavities, Tore Løland, Lars R. Sætran, Robert Olsen, Inge R. Gran, and Reidar Sakariassen, June, 422–426.

Numerical Computation of Shock Waves in a Spherical Cloud of Cavitation Bubbles, Yi-Chun Wang and Christopher E. Brennen, December, 872–880.

Effects of Nuclei Size Distribution on the Dynamics of a Spherical Cloud of Cavitation Bubbles, Yi-Chun Wang, December, 881–886.

Monitoring Fluidization Dynamics for Detection of Changes in Fluidized Bed Composition and Operating Conditions, J. Ruud van Ommen, Jaap C. Schouten, and Cor M. van den Bleek, December, 887–894.

COMPUTATIONAL METHODS

Numerical Modeling of Flow in a Vertical Cooling Crystallizer, M. A. Sima and J. A. Harris, March, 148–154.

Finite Element Modeling of the Acoustic Wave Propagation from a Cavity Near a Free-Surface, M. Lee, March, 205–208.

Numerical Model of Cavitating Propeller Inside of a Tunnel, Jin-Keun Choi and Spyros A. Kinnas, June, 297–304.

Monotonic Convergency Property of Turbulent Flow Solution with Central Difference and QUICK Schemes, Toshiyuki Hayase, June, 351–358.

Multistage Simulation by an Adaptive Finite Element Approach Using Structured Grids, M. Sleiman, A. Tam, M. P. Robichaud, M. F. Peters, and W. G. Habashi, June, 450–459.

Numerical Study of Vortex Shedding from a Circular Cylinder in Linear Shear Flow, A. Mukhopadhyay, P. Venugopal, and S. P. Vanka, June, 460–468.

Numerical Study of Developing Flow and Heat Transfer in a Wavy Passage, K. Stone and S. P. Vanka, December, 713–719.

FLOW MEASUREMENTS

A Computer-Controlled Pressure Standard, Othon K. Rediniotis, March, 210–212.

Singularity Detection in Experimental Data by Means of Wavelet Transform, F. Morency and J. Lemay, June, 418–421.

Fluid Motion in Ultrasonic Flowmeter Cavities, Tore Løland, Lars R. Sætran, Robert Olsen, Inge R. Gran, and Reidar Sakariassen, June, 422–426.

 Copyright © 2000 by ASME

Comparison of Flying-Hot-Wire and Stationary-Hot-Wire Measurements of Flow Over a Backward-Facing Step, O. O. Badran and H. H. Bruun, June, 441–445.

A Multiple Disk Probe for Inexpensive and Robust Velocimetry, Sheldon I. Green and Steven N. Rogak, June, 446–449.

Quintuple Hot-Wire Measurements of the Turbulence Structure in Confined Swirling Flows, F. Holzäpfel, B. Lenze, and W. Leuckel, September, 517–525.

Cinema PIV and Its Application to Impinging Vortex Systems, J.-C. Lin and D. Rockwell, December, 720–724.

Analytical and Experimental Investigation of Laminar Channel Flow with Respect to Flow Metering, Franz Peters, December, 757–761.

FLOWS THROUGH POROUS MEDIA

Particle Arrestance Modeling Within Fibrous Porous Media, James Giuliani and Kambiz Vafai, March, 155–162.

A Macroscopic Turbulence Model for Flow in a Porous Medium, A. Nakayama and F. Kuwahara, June, 427–433.

The Effect of Permeability Variations on the Flow in a Heterogeneous Porous Channel Subject to Rotation, Peter Vadasz and Mark A. Havstad, September, 568–573.

FLUID MACHINERY

A Plexiglas Research Pump with Calibrated Magnetic Bearings/Load Cells for Radial and Axial Hydraulic Force Measurement, D. O. Baun and R. D. Flack, March, 126–132.

Primary/Leakage Flow Interaction in a Pump Stage, E. A. Baskharone and N. J. Wyman, March, 133–138.

Pump Research and Development: Past, Present, and Future — An American Perspective, S. Gopalakrishnan, June, 237–247.

Pump Research and Development: Past, Present and Future, Peter H. Hergt, June, 248–253.

Pump Research and Development: Past, Present, and Future — Japanese Perspective, Hideo Ohashi and Yoshinobu Tsujimoto, June, 254–258.

The Rotordynamic Forces on an Open-Type Centrifugal Compressor Impeller in Whirling Motion, Yoshiki Yoshida, Yoshihobu Tsujimoto, Nobuhiro Ishii, Hideo Ohashi, and Fumitake Kano, June, 259–265.

Performance Analysis of Automotive Torque Converter Elements, E. Ejiri and M. Kubo, June, 266–275.

Experimental Study on the Aeroacoustic Behavior of a Forward-Curved Blades Centrifugal Fan, Sandra Velarde-Suárez, Carlos Santolaria-Morros, and Rafael Ballesteros-Tajadura, June, 276–281.

Steady and Unsteady Computations of Turbulent Flows Induced by a 4/45° Pitched-Blade Impeller, K. Wechsler, M. Breuer, and F. Durst, June, 318–329.

Influence of the Flatness Ratio of an Automotive Torque Converter on Hydrodynamic Performance, E. Ejiri and M. Kubo, September, 614–620.

The Unsteady Pressure Field in a High Specific Speed Centrifugal Pump Impeller — Part I: Influence of the Volute, Kevin A. Kaupert and Thomas Staubli, September, 621–626.

The Unsteady Pressure Field in a High Specific Speed Centrifugal Pump Impeller — Part II: Transient Hysteresis in the Characteristic, Kevin A. Kaupert and Thomas Staubli, September, 627–632.

Experimental Measurements of Rotordynamic Forces Caused by Shroud Pump Leakage, Robert V. Uy and Christopher E. Brennen, September, 633–637.

Experimental Investigation of the Flow Field in an Automotive Torque Converter Stator, Y. Dong and B. Lakshminarayna, December, 788–797.

Field Study on Pump Vibration and ISO's New Criteria, Toshiyuki Osada, Takashi Kawakami, Tadashi Yokoi, and Yoshinobu Tsujimoto, December, 798–803.

Experimental Investigation of Blade Loading Effects at Design Flow in Rotating Passages of Centrifugal Impellers (Data Bank Contribution), Nicholas H. Hesse and J. H. G. Howard, December, 813–823.

Turbulence Modeling and Computation of Viscous Transitional Flows for Low Pressure Turbines, A. Chernobrovkin and B. Lakshminarayana, December, 824–833.

Transient Behavior of a Cavitating Centrifugal Pump at Rapid Change in Operating Conditions — Part 1: Transient Phenomena at Opening/Closure of Discharge Valve, T. Tanaka and H. Tsukamoto, December, 841–849.

Transient Behavior of a Cavitating Centrifugal Pump at Rapid Change in Operating Conditions — Part 2: Transient Phenomena at Pump Startup/Shutdown, T. Tanaka and H. Tsukamoto, December, 850–856.

Transient Behavior of a Cavitating Centrifugal Pump at Rapid Change in Operating Conditions — Part 3: Classifications of Transient Phenomena, T. Tanaka and H. Tsukamoto, December, 857–865.

FLUID-STRUCTURE INTERACTIONS

On Pressure-Velocity Correlation of Steady and Oscillating Flows in Regenerators Made of Wire Screens, Chin-Tsau Hsu, Huili Fu, and Ping Cheng, March, 52–56.

Biologically-Inspired Bodies Under Surface Waves — Part 1: Load Measurements, Promode R. Bandyopadhyay, William H. Nedderman, and James L. Dick, June, 469–478.

Biologically-Inspired Bodies Under Surface Waves — Part 2: Theoretical Control of Maneuvering, Promode R. Bandyopadhyay, Sahjendra N. Singh, and Francis Chockalingam, June, 479–487.

Hydrodynamic Characteristics of a Mechanical Pectoral Fin, Naomi Kato, September, 605–613.

Three-Dimensional Numerical Analysis of Flow-Induced Vibration in Turbomachinery, Chen Zuoyi, Wang Jihong, and Liu Hong, December, 804–807.

GENERAL TOPICS

Optimization of Trailing Edge Ejection Mixing Losses: A Theoretical and Experimental Study, M. T. Schobeiri and K. Pappu, March, 118–125.

The Cavermod Device: Hydrodynamic Aspects and Erosion Tests, E. G. Filali and J. M. Michel, June, 305–311.

The Cavermod Device: Force Measurements, E. G. Filali, J. M. Michel, S. Hattori, and S. Fujikawa, June, 312–317.

The Design of a Droplet Ejector, P. Grassia, September, 658–664.

Unsteady Deformation and Internal Circulation of a Liquid Drop in a Zero Gravity Uniform Flow, Mohammad Farshchi and Mohammad Hassan Rahimian, September, 665–672.

HEAT CONVECTION

Numerical Study of Developing Flow and Heat Transfer in a Wavy Passage, K. Stone and S. P. Vanka, December, 713–719.

JET FLOWS

Experimental Study of the Behavior of Confined Variable Density Jets in a Time Varying Crossflow, N. Raud, Y. Bury, R. Bazile, J. Boree, and G. Charnay, March, 65–72.

A pdf Description of Turbulent Axisymmetric Free Jet Flow, Ming-Hua Chen and Zuu-Chang Hong, March, 73–79.

A Generic Centerline Velocity Decay Curve for Initially Turbulent Axisymmetric Jets, George Papadopoulos and William M. Pitts, March, 80–85.

Transient Turbulent Gaseous Fuel Jets for Diesel Engines, Philip G. Hill and Patric Ouellette, March, 93–101.

Toward a Vortex Breakdown Condition for Swirling Annular Jets, C. F. Stein, March, 102–105.

Jets in a Crossflow: Effects of Geometry and Blowing Ratio, M. J. Findlay, M. Salcudean, and I. S. Gartshore, June, 373–378.

Unstable Asymmetric Modes of a Liquid Jet, S. X. Shi, D. G. Xi, J. R. Qin, N. Liu, and G. C. Shu, June, 379–383.
Near Surface Characterization of an Impinging Elliptic Jet Array, Simona C. Arjocu and James A. Liburdy, June, 384–390.
Energy Concentrated and Self-Resonating Mini-Extended Jet Nozzle Used for Jet Drilling, B. J. Sun and D. C. Yan, June, 391–395.
Investigations of 3D Turbulent Flow Inside and Around a Water-Jet Intake Duct Under Different Operating Conditions, Peixin Hu and Mehrdad Zangeneh, June, 396–404.
Crossflow Characteristics of an Oscillating Jet in a Thin Slab Casting Mould, Nicholas J. Lawson and Malcolm R. Davidson, September, 588–595.
Mean and Turbulence Characteristics of Three-Dimensional Wall Jet on Convex Cylindrical Surfaces, B. H. Lakshmana Gowda and V. S. B. Durbha, September, 596–604.
Flow and Noise Characteristics of Notched Elliptic-Orifice Jets, S. B. Verma and E. Rathakrishnan, September, 690–693.
Effect of Injected Longitudinal Vorticity on Particle Dispersion in a Swirling, Coaxial Jet, Ryan B. Wicker and John K. Eaton, December, 766–772.
Study of Several Jets Impinging on a Plane Wall: Visualizations and Laser Velocimetry Investigations, A. Bernard, L.-E. Brizzi, and J.-L. Bousgarbiès, December, 808–812.

MICRO FLUID

The Fluid Mechanics of Microdevices — The Freeman Scholar Lecture, Mohamed Gad-el-Hak, March, 5–33.
Hydromagnetic Stability of Current-Induced Flow in a Small Gap Between Concentric Cylinders, Min-Hsing Chang and Cha'o-Kuang Chen, September, 548–554.
Effect of Electrostatic Fluid on Film Rupture, Rama Subba Reddy Gorla and Larry W. Byrd, September, 651–657.
Viscous Thin-Film Flow over a Round-Crested Weir, Kenneth J. Ruschak and Steven J. Weinstein, September, 673–677.

MULTIPHASE FLOWS

Numerical Modeling of Flow in a Vertical Cooling Crystallizer, M. A. Sima and J. A. Harris, March, 148–154.
Analysis on Liquid-Vapor Bubbly-Flow Systems in Reciprocating Motion, Claudia O. Iyer and Wen-Jei Yang, March, 185–190.
Measurement in the Wake Region of Two Bubbles in Close Proximity by Combined Shadow-Image and PIV Techniques, A. Tokuhiro, A. Fujiwara, K. Hishida, and M. Maeda, March, 191–197.
Predictable Model for Characteristics of One-Dimensional Solid-Gas-Liquid Three-Phase Mixtures Flow Along a Vertical Pipeline with an Abrupt Enlargement in Diameter, Natsuo Hatta, Masaaki Omodaka, Fumitaka Nakajima, Takahiro Takatsu, Hitoshi Fujimoto, and Hirohiko Takuda, June, 330–342.
Theoretical Modeling of Central Air-Jet Pump Performance for Pneumatic Transportation of Bulk Solids, D. Wang and P. W. Wypych, June, 365–372.
Experimental Analysis of Bubble Shapes During Condensation in Miscible and Immiscible Liquids, Haim Kalman and Amos Ullmann, June, 496–502.
Flow Pattern Transition During Gas Liquid Upflow Through Vertical Concentric Annuli — Part I: Experimental Investigations, G. Das, P. K. Das, N. K. Purohit, and A. K. Mitra, December, 895–901.
Flow Pattern Transition During Gas Liquid Upflow Through Vertical Concentric Annuli — Part II: Mechanistic Models, G. Das, P. K. Das, N. K. Purohit, and A. K. Mitra, December, 902–907.

NON-NEWTONIAN FLOWS

Laminar Flow of a Nonlinear Viscoplastic Fluid Through an Axisymmetric Sudden Expansion, Khaled J. Hammad, M. Volkan Otügen, George C. Vradis, and Engin B. Arik, June, 488–495.

PARTICULATE FLOW

Particle Arrestance Modeling Within Fibrous Porous Media, James Giuliani and Kambiz Vafai, March, 155–162.
High Flux Rate Particle Filtration from Liquids, G. L. Chahine, K. M. Kalumuck, Patrick D. Aley, and G. S. Frederick, March, 163–170.
Effects of Increasing Particle Loading in an Axisymmetric, Vertical, Liquid-Solid Sudden Expansion Flow (Data Bank Contribution), Maria Founti, Thomas Achimastos, and Athinodoros Klipfel, March, 171–178.
Mechanics of Immersed Particle Collisions, Robert Zenit and Melany L. Hunt, March, 179–184.
The Effects of Secondary Flow and Passive Injection on the Motion of Solid Particles Entrained in Flow Through a Curved Converging Channel, James J. Ventresca and Wilfred T. Rouleau, June, 359–364.
Dusty Gas Flow in a Converging-Diverging Nozzle, O. Igra, I. Elperin, and G. Ben-Dor, December, 908–913.

PIPE, DUCT, CHANNEL FLOWS

Pipe Flow with Radial Inflow: Experimental and Modeling Work, R. M. S. M. Schulkes, Trygve Rinde, and Ole Harald Utvik, March, 106–111.
On the Suitability of the Low Mach Number Assumption in the Modeling of the Damage Induced by Pressure Transients in Piping Systems, Felipe B. Freitas Rachid and Heraldo S. Costa Mattos, March, 112–117.
The Effects of Secondary Flow and Passive Injection on the Motion of Solid Particles Entrained in Flow Through a Curved Converging Channel, James J. Ventresca and Wilfred T. Rouleau, June, 359–364.
Experimental Investigations of Steady Flow in a Tube with Circumferential Wall Cavity, Krzysztof Cieslicki and Anna Lasowska, June, 405–409.
Flow Measurements in a Fishtail Diffuser with Strong Curvature, M. I. Yaras, June, 410–417.
Study on Side-Jet Injection Near a Duct Entry with Various Injection Angles, Tong-Miin Liou, Chin-Chun Liao, Shih-Hui Chen, and Hsin-Ming Lin, September, 580–587.
Turbulent Flow in a Rotating Two Pass Smooth Channel, Shou-Shing Hsieh, Ping-Ju Chen, and Hsiang-Jung Chin, December, 725–734.
Comparison and Scaling of the Bursting Period in Rough and Smooth Walls Channel Flows, S. Demare, L. Labraga, and C. Tournier, December, 735–746.
Analytical and Experimental Investigation of Laminar Channel Flow with Respect to Flow Metering, Franz Peters, December, 757–761.

STABILITY AND TRANSITION

Turbulence Modeling and Computation of Viscous Transitional Flows for Low Pressure Turbines, A. Chernobrovkin and B. Lakshminarayana, December, 824–833.

TURBULENT FLOWS

Concentration Profiles in Shallow Turbulent Wakes, R. Balachandar, M. F. Tachie, and V. H. Chu, March, 34–43.
The Effect of Biofilms on Turbulent Boundary Layers, M. P. Schultz and G. W. Swain, March, 44–51.
Modeling Turbulent Wall Flows Subjected to Strong Pressure Variations, K. Hanjalic, I. Hadzic, and S. Jakiric, March, 57–64.
Investigations of 3D Turbulent Flow Inside and Around a Water-Jet Intake Duct Under Different Operating Conditions, Peixin Hu and Mehrdad Zangeneh, June, 396–404.
Quintuple Hot-Wire Measurements of the Turbulence Structure in Confined Swirling Flows, F. Holzäpfel, B. Lenze, and W. Leuckel, September, 517–525.

Synergistic Effects in Turbulent Drag Reduction by Riblets and Polymer Additives, H. Mizunuma, K. Ueda, and Y. Yokouchi, September, 533–540.
Turbulent Boundary Layers in Low Reynolds Number Shallow Open Channel Flows, Ram Balachandar and Shyam S. Ramachandran, September, 684–689.
Comparison and Scaling of the Bursting Period in Rough and Smooth Walls Channel Flows, S. Demare, L. Labraga, and C. Tournier, December, 735–746.
A Modified Model for Diffusion in Second-Moment Turbulence Closures, Anthony G. Straatman, December, 747–756.
Single Jet Mixing at Arbitrary Angle in Turbulent Tube Flow, Zhigang Feng, Xiaodong Wang, and Larry J. Forney, December, 762–765.

UNSTEADY FLOWS

Experimental Study of the Behavior of Confined Variable Density Jets in a Time Varying Crossflow, N. Raud, Y. Bury, R. Bazile, J. Borée, and G. Charnay, March, 65–72.
Steady and Unsteady Computations of Turbulent Flows Induced by a 4/45° Pitched-Blade Impeller, K. Wechsler, M. Breuer, and F. Durst, June, 318–329.
Vortex Detachment and Reverse Flow in Pulsatile Laminar Flow Through Axisymmetric Sudden Expansions, S. Tavoularis and R. K. Singh, September, 574–579.
Air Influence on Hydraulic Transients on Fluid System with Air Valves, T. S. Lee, September, 646–650.

VORTICES

Toward a Vortex Breakdown Condition for Swirling Annular Jets, C. F. Stein, March, 102–105.
Modified Formula for the Flow Velocity Profile in a Vortex, A. Szumowski, J. Piechna, W. Selerowicz, and G. Sobieraj, March, 208–210.
An Experimental Analysis of Vortex Trapping Techniques, Todd W. Riddle, Alan J. Wadcock, Jin Tso, and Russell M. Cummings, September, 555–559.
Numerical Computation of Tip Vortex Flow Generated by a Marine Propeller, Chao-Tsung Hsiao and Laura L. Pauley, September, 638–645.
Operating Condition and Geometry Influences on Vortex Development in Cyclone, B. Reinhardt, A. Cordonnier, and P. Florent, September, 693–696.
